

Signage

Project Signage Templates

Short repeat pattern template

Tall repeat pattern templated with printed logos and cityscape

These Signage System templates give direction on how to apply the Built Environs identity to signs around our project worksites.

The proportional guidelines have been developed to ensure that signage has clarity, impact and can be easily read from a distance. Please use them in conjunction with the guidelines detailed in this document to ensure correct use of the Built Environs logo.

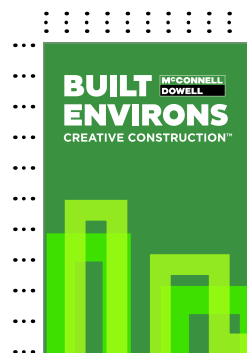

If you need a different sign, or a situation arises that is not covered in these guidelines please make contact for clarification and direction: brand@builtenvirons.com.au

Templates can be downloaded from Brand Hub

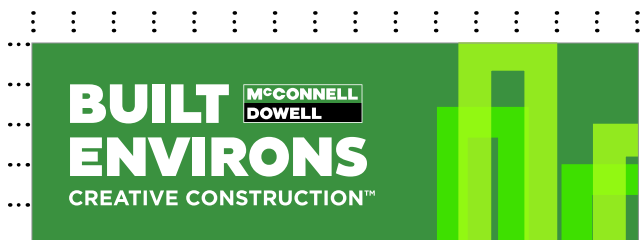

Tall repeat pattern proportions — logos on painted background

1x1 & 1/2

1 & 1/2 x 1

1x3
